

Program of Symposium

Wednesday, September 26, 2001

15:00 - 19:00 Registration at FAZAT Steyr

Thursday, September 27, 2001

08:00 - 09:00 Registration at FAZAT Steyr

09:00 - 09:10 Opening of Symposium

Session 1

Chairman: K.-H. Laermann

09:10 - 09:40	Affenzeller J. (Technical University Graz, Austria)	Research as the Fundamental Base of Any Innovation Procedure	3
09:40 - 10:00	Stempniewicz M., Będziński R., Gawin E. (Wrocław University of Technology, Poland)	Application of Electronic Speckle Pattern Interferometry for Anisotropic Mechanical Behavior of Bone	5
10:00 - 10:20	Bláhová M., Holý S., Hrubant L., Vitek K., Volf J. (Czech Technical University in Prague, Czech Republic)	In Vivo Measuring of Bone Remodelling	7
10:20 - 10:40	Cosmi F., Dreossi D., Vittur F. (University of Trieste, Italy)	Bone Mechanical Properties Estimation with the Cell Method	9
10:40 - 11:00	Coffee Break		

Session 2

Chairman: J. Affenzeller

11:00 - 11:20	Nicoletto G. (University of Parma, Italy)	Correlation of Plastic Strain and Surface Texture at the Grain Level in an Al-Alloy	13
11:20 - 11:40	Semenski D., Jecić S., Bakić A. (University of Zagreb, Croatia)	Experimental Contact Caustics in Isotropic Materials	15
11:40 - 12:00	Pyrzanowski P., Stupnicki J. (Warsaw University of Technology, Poland)	Study of Interaction of Squat-Type Crack Faces Using Grating Holographic Interferometry	17
12:00 - 12:20	Siebert Th., El-Ratal W., Wegner R., Ettemeyer A. (Ettemeyer AG, Germany)	Combine Simulation and Experiment in Automotive Testing with ESPI Measurement	21
12:20 - 12:40	Major Z., Lang R.W. (University Leoben, Austria)	Rate Dependent Deformation, Yield, Post-Yield and Failure Behavior of Engineering Polymers	23
13:00	Lunch		
14:15 - 16:30	Technical Visit at Magna Steyr		
19:00	Dinner at City Hall of Steyr		

Friday, September 28, 2001

Session 3

Chairman: J.C. Radon

08:30 - 09:00	Laermann K.H. (Bergische Universität Wuppertal, Germany)	Determination of Internal Structural Parameters from Measured Data	27
09:00 - 09:20	Kitzing H. (HBM – Hottinger Baldwin Messtechnik, Germany)	Electronic Identification of Measuring Devices for Strain Gauges in 3- and 4-Wire Connections	29
09:20 - 09:40	Domazet Ž., Barlé J., Đukić P. (University of Split, Croatia)	Strain Gage Measurements in the New Man/S50MC-C Engine on the Test Bed at Shipyard Split	31
09:40 - 10:00	Freddi A., Gradassi A.R., Olmi G., Croccolo D., Ciavatti V. (University of Bologna, Italy)	A New Device For In-Field Measurement of the Forces Transmitted by a Skier to Skies	33
10:00 - 10:20	Ilescu N., Atanasiu C. (University "Politehnica" of Bucharest, Romania)	A New Method for Measuring of Vertical Force Between Wheel and Rail	35
10:20 - 10:40	Coffee Break		

Session 4 – Poster

Optical Methods

Chairman: E. Ficker

	Borbás L., Szalai J., Thamm F. (Budapest University of Economic Sciences, Hungary)	Application of the Photostress Method on Wood and Wooden Structures	39
	Brozeit A., Schendl A., Stifter P., Kneidinger B. (Siemens SGP, Austria)	Measurement of the Vibrations of the Sidewall of a Metro-Carbody with the Laser-Velocity-Measure-Gauge	41
	Errapart A. (Tallinn Technical University, Estonia)	Complete Axisymmetric Residual Stress Measurement in Glass	43
	Galietti U., Genovese K., Pappalettere C., Quarta V. (Polytechnic Institute of Bari, Italy)	Photoelastic Stress Analysis on Rapid Prototyping Models	45
	Gomerčić M., Drvar N. (University of Zagreb, Croatia)	A Novel Videoextensometer for Strain Measurement on Tensile Testing Machines	47
10:40 - 12:30	Horváth P., Bača Z., Hrabovský M., Šmid P. (Palacky University, Czech Republic)	The Theory of Measurement of Stress by Means of a Speckle Decorrelation	49
	Kulenović Z. (Split College of Maritime Study, Croatia)	Determination of Stresses and Deflections in Circular Ribbed Plate	51
	Păstrav I., Badea C., Dulescu C. (Technical University of Cluj-Napoca, Romania)	Study by Shadow-Moiré Method of the Prismatic Bars Subjected to Torsion	53
	Rössler T., Hrabovský M., Kepřt J., Bartoněk L. (Palacky University, Czech Republic)	Control of Pump Blade by Moiré Topography Fringe-Shifting Method	55
	Slabeycius J., Košťál P., Cúth V., Bokůvka O. (University of Trencin, Slovak Republic)	Vibrational Modes of Tyres -FEM Modeling and Experimental Investigation	57
	Strain Gauge Techniques		
	Berka L. (Czech Technical University in Prague, Czech Republic)	Chairman: H. Kitizing On the Ring Cutting Method of the Residual Stress Analysis	59

Doubrava K., Holý S., Kuliš Z., Weinberg O., Vitek
K. (Czech Technical University in Prague, Czech Republic)

Application of Hole Drilling Method for Determination of Residual Stress Gradient
on Examined Surface 61

Lukacs A., Reisenberger A., Dutzler E. (Engineering Center Steyr GmbH, Austria)	Measurement-Data Acquisition from Strain Gauges and Processing with Fatigue Prediction Software	63
Macura P., Fiala A., Zela L. (Technical University Ostrava, Czech Republic)	Residual Stresses at the Spiral Welded Tubes	65
Sandu A., Sandu M., Atanasiu C. (University "Politehnica" of Bucharest, Romania)	A Low-Profile Sensor for Six Force/Torque Components	67
Stockmann M., Naumann J. (Chemnitz University of Technology, Germany)	The Resistance Behaviour of High Elongation Strain Gages	69
Material Sciences		
Alfirević I., Matejiček F., Kozak D. (University of Zagreb, Croatia)	Chairman: W. Eichlseder State-of-Stress Modelling in an Inhomogenous Senb Fracture Toughness Specimen	71
Blaj L. (Technical University of Timisoara, Romania)	The Influence of the Hardening Laws on a Multimechanism Constitutive Model	73
Cammarota G.P., Ceschini L., Morri A., Orazi L. (University of Bologna, Italy)	Impact Test in Ti6Al 4V and AA6082 Welded Joints	75
Fuxa J. (Technical University Ostrava, Czech Republic)	Strength Criterion for Quasi-Isotropic Statically Loaded Material	77
Gajdoš L., Šperl M. (Academy of Sciences of the Czech Republic, Czech Republic)	Strength of Defective Welds	79
Ghezzi F., Minak G., Orazi L., Morelli P. (University of Bologna, Italy)	Experimental Determination of Material Parameters for a Low Cycle Fatigue Model	81
Gliha V., Mišina N., Oršulić M. (University of Split, Croatia)	Reduction of Residual Stresses of Welded Joints of Microalloyed Steel Alloyed by Vanadium	83
Kaleta J., Lewandowski D., Wiśniewski W. (Wrocław University of Technology, Poland)	Martensitic Transformation Induced by Cyclic Plastic Strain – Ways of Examinations	85
Kompiš M., Konkol F. (University of Žilina, Czech Republic)	Identification of Constitutive Parameters in Sheet Metal Forming	87
Kunz L., Bokůvka O. (Academy of Sciences of the Czech Republic, Czech Republic)	Influence of Mean Stress on Cyclic Hardening of Cu63Zn a-Brass	89
Mišina N., Oršulić M., Polajnar I. (University of Split, Croatia)	Some Changes of Welded Joint Properties of Steel N-A-Xtra70 Due to Residual Heat Stress Relieving	91
Pascu I., Stanimir A. (University of Craiova, Romania)	Research about the Influence of the Technological Parameters on the Hardness of the Electrical Contacts Based on Tungsten Powder	93
Sliwa R.E., Nowotynska I. (Technical University of Rzeszow, Poland)	Structural and Mechanical Aspects of Forming the Dual Phase Steels without Heat Treatment	95
Biomechanics		
Bartoněk L., Kepřt J., Hrabálek L. (Palacky University, Czech Republic)	Chairman: A. Schendl Measurements of Biomechanical Characteristics of Cadaverous Lumbar Spines by Video and Computer Systems	97

Benčat J. (University of Transportation and Communication, Slovak Republic)	Experimental Investigation of the Microtremor Due the Traffics Means	99
Drelich R., Pakuła M., Kaczmarek M., Kubik J. (Bydgoszcz University, Poland)	Studies of Structure of Biomaterials by Ultrasound. Results for Woods and Bones	101
Filipiak J., Morasiewicz L. (Wrocław University of Technology, Poland)	Assessment of the Effect of Hybrid Implant Systems in the Ilizarov Fixator on the Stability of Fragments of Femur Subjected to Elongation	103
Gawin E., Będziński R. (Wrocław University of Technology, Poland)	Investigations into Influence of Strain on Remodeling of Bone Structures	105
John A. (Silesian University of Technology, Poland)	The Experimental Ground for Numerical Modeling of Human Pelvic Bone	107
Petrtyl M., Melzerová L., Danešová J. (Czech Technical University in Prague, Czech Republic)	Experimental Verification of Viscoelastic Properties of Compact Bone	109
Reihnsner R., Müllner Th., Eberhardsteiner J. (Vienna University of Technology, Austria)	A New Cryo-Clamp Designed for Biomechanical Tests with Human Tendons and Ligaments	111
Svoboda J., Solc Z. (Czech Technical University in Prague, Czech Republic)	Pedestrian Protection – Simulation the Pedestrian in Collision with Personal Car	113
Szábo G., Kocsis L., Thamm F., Szántó P., Wolfart R., Kocsis M., Mike A. (Janus Pannonius University Pécs, Hungary)	Static and Dynamic Investigation of the Strength and Durability of Screw-Fastened Dental Prostheses	115
Vitek K., Valenta J., Horny L. (Czech Technical University in Prague, Czech Republic)	Opening Angle and Aging of Human Main Coronary Arteries	117
Special Problems - Measurement Equipment	Chairman: H.-D. Tietz	
Đukić P., Barlé J., Baras M. (University of Split, Croatia)	Use of Real Time Wavelet Analysis for Processing of Acoustic Waves in “Impact Echo” Measurements	119
Fuchs K., Krouzecky N., Leopoldseder A., Linsbauer H., Nowak G., Sajna A. (Vienna University of Technology, Austria)	The “Horizontal Wedge Splitting Test Method (HWST)” Redesigned – Attache Case Styling	121
Jecic S., Duras M. (University of Zagreb, Croatia)	New Device for Body Moments of Inertia Measurement Using Torsion Pendulum	123
Kral P.J. (Vienna University of Technology, Austria)	Measurement of Sound Levels on Gears – Comparison of Measurements on Several Types of Gears	125
Kral P.J. (Vienna University of Technology, Austria)	Plastic Torsion in Sector Conductors – Comparison of Calculations with Measurements	127
Rak M. (University of Zagreb, Croatia)	Identification of Damages in Beams and Framed Structure Using Measured Frequencies	129
Stanimir A., Pascu I. (University of Craiova, Romania)	The Device for the Optimisation of Geometry of the Cutting Tools, Integrated on a Kistler System for Force Measure	131
Vitek K., Holý S., Kraus I., Ganev N. (Czech Technical University in Prague, Czech Republic)	FEM Support of the Optimization of the Material Constants Measuring	133

Special Problems - General Aspects		Chairman: Ž. Domazet	
	Adamec J., Nožička J., Kořenář J. (Czech Technical University in Prague, Czech Republic)	Reynolds Stress in Pulsatile Flow	135
	Alexandrescu L., Ciofoaia V., Curtu I. (Transilvania University of Brasov, Romania)	Static and Dynamic Rigidity of Rubber Spring	137
	Amariei N., Comandar C., Leon D. (Technical University "Gh. Asachi" Iasi, Romania)	Tensiometric Measurements upon a Retention Tap with Annular Flapper Valve	139
	Bal N., Hărdău M., Șomotecan M. (Technical University of Cluj-Napoca, Romania)	Stresses Evaluation in the Cylinder of a Belt Conveyor	141
	Cherciu M., Dumitru N. (University of Craiova, Romania)	The Experimental Modeling of the Kinematic Parameters Variation in Dynamical Conditions, for the Spatial Mechanism R-SRRT	143
	Croccolo D., Reggiani S. (University of Bologna, Italy)	Friction Coefficient Calculation in Compression Couplings Using Experimental and Numerical Models	145
	Egger M., Hoffmann K. (Vienna University of Technology, Austria)	Deformation of the Conveyor Belt Due to the Overrunning Process	147
	Godor I., Leitner H. (University Leoben, Austria)	Behaviour of Pre-Tension of an Aluminium Screw Fastening	149
	Kepka M. (Skoda Vyzkum s.r.o., Czech Republic)	Relations of Experimental Methods and Numerical Simulations at Development of SKODA City Buses and Trolleybuses	151
	Nicoletto G., Vettori M. (University of Parma, Italy)	Mechanical Characterization of Unidirectional vs. Woven CFRPs	153
	Popescu D., Băgnaru D. (University of Craiova, Romania)	Experimental Stand for Dynamic Analysis of Elastic Structures at Internal Grinding Machines	155
	Sliwa R.E., Miszuris W. (Technical University of Rzeszow, Poland)	Problem of Interface in Co-Extrusion of Bi-Metallic Rods	157
	Španiel M., Dynybyl V., Jančík L., Šimek D. (Czech Technical University in Prague, Czech Republic)	The Results of Modeling and Testing of Harmonic Drive	159
	Trčková J., Procházka P. (Academy of Sciences of the Czech Republic, Czech Republic)	Parametric Study of Geotechnical Problems by the Coupled Modelling Method	161
	Žigulić R., Jakšić N., Boltežar M., Butković M. (University of Rijeka, Croatia)	Influence of Bearing Dry Friction on Rotor Nonlinear Vibrations	163
	Zsáry Á. (Budapest University of Economic Sciences, Hungary)	Stress Measurement Results on Thin Walled Construction of Autobus	165
12:30	Lunch		
Session 5		Chairman: G. Nicoletto	
14:00 - 14:20	Eichlseder W. (University Leoben, Austria)	Comparison of Test Results with Concepts for the Simulation of the Stress Gradient and Size Effect Under Fatigue Loading	171
14:20 - 14:40	Ikegami K. (Tokyo Denki University, Japan)	Residual Stress of Thermosetting Resin after Curing Process	173
14:40 - 15:00	Radon J.C. (Imperial College of Science, Technology and Medicine, United Kingdom)	Interaction of Creep and Fatigue	175

15:00 - 15:20	Plánička F., Vacek V., Václavík M. (University of West Bohemia, Czech Republic)	One Possibility of Fatigue Life Estimation	177
15:20 - 15:40	Růžička M., Papuga J. (Czech Technical University in Prague, Czech Republic)	Fatigue Strength of Large Shafts	179
15:40 - 16:00	Coffee Break		
Session 6		Chairman: M. Stockmann	
16:00 - 16:20	Tietz H.-D., Mack B., Gieland U., Pfeiffer L., Kraus I., Ganev N., Liska M. (University of Applied Sciences Zwickau, Germany)	Influence of the Real Structure on Residual Stresses in Plasma-Sprayed Coatings	183
16:20 - 16:40	Zucchelli A., Tomesani L., Costa F. (University of Bologna, Italy)	Experimental Analysis of a Vulcanized Rubber Using a T-Peel Test	185
16:40 - 17:00	Lahayne O., Zernetsch B., Eberhardsteiner J. (Vienna University of Technology, Austria)	Investigation of the Influence of Experimental Parameters on Rubber Friction	187
17:30	Departure to Kremsmünster		
20:30	Banquet		

Saturday, September 29, 2001

Session 7

Chairman: L. Kunz

08:30 - 09:00	Mang, H.A., Lackner R., (Vienna University of Technology, Austria)	Experimental Requirements for Thermochemomechanical Analyses of Concrete Structures at Early Ages	191
09:00 - 09:20	Rainer G. (AVL List GmbH, Austria)	Experimental Validated Simulation Models Shorten the Development Time	193
09:20 - 09:40	Thanner G., Mrazek Th. (Steyr-Daimler-Puch Engineering Center, Austria)	Virtual Test Bench	195
09:40 - 10:00	Kunz L., Lukáš P., Konečná R. (Academy of Sciences of the Czech Republic, Czech Republic)	Determination of Microstructure of CMSX-4 Single Crystals	197
10:00 - 10:20	Liptáková T., Hadzima B., Gärtnerová V. (Slovak Gas Industry, Slovak Republic)	Corrosion Degradation of the Mg-Al Alloys in Different Environments	199
10:20 - 10:40	Coffee Break		

Session 8

Chairman: K. Hoffmann

10:40 - 11:00	Jakšič N., Braut S., Butković M., Boltežar M. (University of Ljubljana, Slovenia)	A S.D.O.F. System Parameter Identification Based on its Free Response	203
11:00 - 11:20	Kaleta J. (Wrocław University of Technology, Poland)	Magnetovision Observations of Fatigue Process in Ferromagnetics	205
11:20 - 11:40	Košťal P., Bokůvka O., Cúth V., Slabeycius J., Vavro J. (University of Trencin, Slovak Republic)	The Ultrasonic Inspection of Adhesive Forces	207
11:40 - 12:00	Száva I., Curtu I., Ciofoaia V., Botiş M., Dogaru F. (Transilvania University of Brasov, Romania)	Experimental and Theoretical Study of the Wood Joints	209

18th Danubia-Adria-Symposium on Experimental Methods in Solid Mechanics
September 26-29, 2001
Steyr, Austria

12:00	Closing of Symposium
12:30	Lunch
